OULUN YLIOPISTO
UNIVERSITY of OULU

Aim

The aim of the project is to develop research-based pedagogical models, in which new collaborative technologies (e.g. blogs, 3d -environments, wikis) are applied.

Wiki and mobile phone

•Wiki as a tool to produce learning material collaboratively

•Wiki as a learning environment

•Content is public, but writing needs a username.

•Small groups write and make links about their learning

•Includes instructions and support (discussion area)

•Possibility to follow wiki events by RSS-feeds (browser)

•General information of the course is also available from Google calendar

Snellmanian kirjasto

Information retrieval services and spaces for collaboration

Brieftec Binder mobile and net application

•1 mobile phone/1 group

•Students make observations by the mobile phone (picture, video, sound, text) to enrich their wikiworking (science book)

•Choose media through net application (comments in net application)

•Edit and save the observations to wiki

V-Lab offers mobilephones and SIM cards
